-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Objections

1. Claim 5 is objected to because of the following informalities: 16 is used to define a cylinder and a side wall. Appropriate correction is required.
2. Claims 7/5 and 8/5 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on another multiple dependent claim. See MPEP § 608.01(n).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-9, 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Hasegawa et al.

Hasegawa et al. shows a fuel injector comprising a chamber 34 with a fuel inlet and a plurality of fuel outlets 35, and comprising a fuel distributor 7 that is arranged in the chamber 34 for the purpose of distributing fuel introduced into the chamber 34 via the fuel inlet to the outlets, characterized in that the fuel distributor 7 comprises a generally rotary symmetric distributor, wherein the chamber 34 is delimited by at least one side wall 341 and that the fuel distributor 7 defines a lid or plug that forms an end wall in relation thereto as recited in claim 2.

Claim Rejections - 35 USC § 103

Art Unit: 3752

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hasegawa et al. in view of Baxter et al.

Baxter et al. teaches a method of assembling a fuel injector in which various parts are welded together to form strong connections between the parts. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Hasegawa et al. by attaching the fuel distributor to an adjacent side wall by means of welding as taught by Baxter et al. to form a strong bond.

7. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hasegawa et al.

It has been held that a recitation with the respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations.

Allowable Subject Matter

8. Claims 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
